12 Wood Stains

Logiflex offers varnish and stain selection among the following 12 colors on all wood applications. The selection available may vary depending on the collections: please refer to the product pages for the selection available by collection. For example, the wooden Madrid chair is only available in Golden Wheat.

Knots and color variation can occur between different wood components of the same piece of furniture, or between different pieces of furniture. This variation is due to the natural characteristics of the wood, and is more contrasting for pale wood colors like Golden Wheat.

In order to help customers researches, a graded-in list presenting the entire collections od Logiflex's principal suppliers has been prepared. It is possible to consult Logiflex graded-in list by visiting logiflex.ca

Note: The graded-in list is based on information at time of the publication of this document. As upholstery suppliers can dis-continue products or increase their prices at their discretion, this list communicated for information purposes only and can not be considered as a sale commitment by Logiflex.

Logiflex offers the option of providing your own upholstery. The price will be based on the cushion grade 2.

Furthermore, Logiflex reserves the right to refuse any upholstery that does not meet Logiflex selection criteria.

COM fabrics must be delivered to the Logiflex factory with freight and duties paid. For COM orders, the order's delivery date is set once Logiflex has received all fabric rolls required for production, following sample approval. All charges to COM acquisition on the customer's behalf will be passed onto the customer.

Leather

All leathers used are "cowhide".

Please note that the warranty does not apply on leather's natural imperfections, such as: scars, marks, and difference in stain within a leather skin or different skins. This specification also applies for standard leather GR5 and Italian leather GR7 and up.

Polyurethane foam

The polyurethane foam used in the manufacturing of our armchairs is antibacterial.

Different densities exist and will vary from one armchair model to the other. Medium-density foam is used for back and seating parts, while the firmer-density foam is used for armrest parts.

CAL 117 Flammability standards

The foam used meets or exceeds the flammability standards of the California Technical Bulletin 117 norms.

CAL 133 Flammability standards

It is possible to order chairs or soft seating that comply with the technical bulletin California 133 (CAL 133) used primarily in public buildings without sprinkler systems. In order to be compliant, the fabrics must be certified CAL 117 and a fire blocking material, which prevents fire from spreading, must be installed under the fabric by Logiflex.

To obtain a certificate from an independent laboratory, you must pay the price of the compliant product to be tested plus a cost to cover the transportation, testing and the issuing of the certificate

Customers interested in ordering a CAL 133 compliant product are encouraged to contact customer service for pricing and instructions.
