Introduction

The Xtension furniture collection

Update Summary

The Xtension price list presents these principal modifications:

DATE	SECTION	MODIFICATIONS
March 3, 2025	**All the Price List**	• All prices have been increased by approximately 3%.

Previous updates:

DATE	SECTION	MODIFICATIONS
December 11, 2024	**Accessories**	• Price adjustment for CT24 and CT118 cable trays.
December 10, 2024	**Accessories**	• Addition of the Shift double monitor arm with docking: SHIFT-2A.
October 16, 2024	**Independant Pedestals**	• Removal of BLEO.
October 8, 2024	**Storage**	• Addition of Xtension credenzas and bookcase : KOEP, OKEP & BBLEP.
June 26, 2024	**Panel Accessories**	• Addition of the glass divider EGS.
March 1, 2024	**All the Price List**	• All prices have been increased by approximately 5%.
November 22, 2023	**Appendix A**	• Removal of high gloss finish.
	Electrical accessories	• Addition of the wire management system BE-WMS-32 & BE-WMD-32. • Addition of port USB A & C SQC. • Removal of the power bar F-714.
July 4, 2023	**Electrical accessories**	• Chicago Code : Certain electrical components are now marked prohibited or restricted for orders in chicago. (USA pricelist only).
May 22, 2023	**Panels**	• Addition of new dimensions for panels PANLL, PANLR, PANT and PANX.
February 1, 2023	**All the Price List**	• All prices have been increased by approximately 5%. • Transition from 6 to 14 grades of fabric. • New certification Indoor Advantage Gold (replace Greenguard).

Our social responsability

At Logiflex, we have chosen to be a responsible North American manufacturer by implementing initiatives for sustainable development. As much as possible, we source local materials and partner with suppliers who prioritize clean manufacturing processes. We also consolidate goods during transport to reduce ou fuel consumption and we continually make changes that help reduce our waste production.

The company is ISO 9001 certified.

You can consult our eco-responsible approach as well as all our certifications in the Certifications section of our website. Find out how our products can help you obtain LEED credits and the Logiflex products that are Indoor Advantage Gold certified.

Conditions of Sale

Prices
The amounts listed in this document are suggested retail prices and may be changed without notice. Applicable taxes are not included. If you have an open and active account with Logiflex, merchandise will be invoiced at the prices prevailing at the time of shipment. A deposit may be requested if the opening of your account has not been completed or if your account has become inactive.

Terms of Payment
Net 30 days F.O.B. Sherbrooke, Quebec. The invoice will be assigned the shipping date and is payable 30 days from that date. Logiflex remains the owner of the merchandise until the invoice is paid in full.

Customized Products (Special Items)

Price requests for customized products or special items can be submitted via the "Member Zone" section of our website, at www.logiflex.ca. Our quotations department will study your request and send you a quotation and a technical drawing for approval as soon as possible. Modifications to quotations or technical drawings can be requested the same way. The approved quotation(s) and technical drawing(s) can then be attached to your purchase order.

Orders
An official purchase order must be issued for all purchases. Your purchase order must contain the following information:

• Your company letterhead
• Your reference number
• The delivery address (with contact name and phone number)
• The complete product codes
• Furniture colour(s)
• Quantities
• Descriptions
• Retail prices and net prices
• Project registration number (if applicable), and your approved quotation and technical drawing (for special items).

Please note that a quotation cannot serve as a purchase order.

Returns

All returns must first be approved by Logiflex. If the return is accepted, a Logiflex customer service representative will send you an official return authorization form in order to facilitate procedures between you, the carrier, and the Logiflex merchandise reception clerk. Additional costs for shipping or other expenses may be applied following any merchandise returns.

Modifications and/or Cancellations

You have 24 hours from the time we acknowledge receipt of your order to make any requests for corrections or modifications. You may cancel your order during this same 24-hour period. If you would like to modify or cancel your order after this 24-hour verification period, please check with a Logiflex customer service representative. Orders cannot be changed or cancelled if production has already begun or if Logiflex has already received the raw materials.

Liability
Logiflex's liability ends once the carrier has delivered all items in good condition. A delivery receipt signed by the customer acknowledges that the shipment is complete and has been received in good condition.

Claims

Logiflex recommends inspecting the shipment before signing the carrier's delivery receipt. You must notify Logiflex of any incomplete shipments or damaged furniture within 30 days after delivery. Requests to replace damaged products can be made via the "Member Zone" section of our website, at www.logiflex.ca. Our after-sales service department will examine your request and help you correct the situation.

Changes
Logiflex reserves the right to make changes to the materials, accessories, components, specifications and designs, and to discontinue collections and/or models, at any time and without prior notice.

Storage and/or Shipping Fees

According to the terms Logiflex set forth in the transport policy. The transport policy can be consulted online in the Private Space.

Items Delivered Disassembled

Some items are delivered disassembled, such as empty desks, empty returns, bridges, arched tables, D, P or Q tables, lateral tables, end tables, hook tables, corner tables and extended-corner tables. To order these items assembled, add a $100 list price. Contact Customer Service for details.

Warranty

Logiflex guarantees to the original purchaser that Logiflex products are free from defects in design, materials and workmanship for the product's lifetime, with certain exceptions.

You may consult the full warranty on the website: **Logiflex Warranty**

Manufacturing Standards

Product Dimensions

For display purposes, the furniture dimensions represented in the price tables on each product page are rounded to the nearest whole number.

Furniture Construction

- All desktops and legs are 1" thick laminate;
- Fronts and backs are 5/8" thick laminate.

Handles

Handles are included for all Xtension furniture with doors. The standard handle, when included, is the H071BL handle (black). Please refer to the Accessories section for the list of handles available from Logiflex.

Space for surfaces

All surfaces offer the option of having a 1.5" space to allow wiring to pass through. Please refer to the different product pages to see and understand its operation.

Locks

Locks are included for all pedestals, lateral file drawers, cabinets and wardrobes. It is possible to specify a finish other than the black standard. Please refer to the Accessories section at the end of this price list to find out about the different finishes available from Logiflex.

Pedestals

All drawers are made of black Medium density fiberboard (MDF) with an average thickness of 7/16". Utility, file and lateral file drawers have full extension slides. The lateral file drawer has a load capacity of 150lbs while the utility and file drawer have a load capacity of 100lbs.

Drawer Fronts

A PVC strip 1.5 mm thick is systematically applied along all drawer front edges.

Wood Grain

The wood grain is always vertical on fronts, furniture doors, walls and panels. Logiflex cannot guarantee that the wood grain will match up on the different parts of a same surface.
Finishes

You must specify the desired finish(es) for each item of furniture ordered. Please make your selection(s) from the Logiflex chart.

Levelers

All furniture items sit on 1" in diameter, white nylon levelers, allowing for up to 1-1/4" height adjustment. The standard finished height for work surfaces is 29".

* Non recommended color for work surfaces.
** For conference tables with 2 or more parts, we do not recommend the use of colors with irregular and contrasted woodgrain like Chiffon, Audacity or Coastal Pear as it results in a pronounced wood grain mismatch.

Colors may vary from 2% to 5% between tfl and hpl laminates due to different technical applications.

See our complete **Colors & Finishes Guide**

Ⓝ New

Appendix A: Colors and Finishes (following)

12 Wood Stains

Logiflex offers varnish and stain selection among the following 12 colors on all wood applications.

Knots and color variation can occur between different wood components of the same piece of furniture, or between different pieces of furniture. This variation is due to the natural characteristics of the wood, and is more contrasting for pale wood colors like Golden Wheat.

WW White Wash

GW Golden Wheat

SD Sand
AT Apricot
PN Pecan
BR Brandy

CT Chestnut

CF Coffee
ES Espresso
BO Bordeaux
BW Black Wash
BK Bark

- Due to its natural properties of wood, grain pattern and finish color variation can be expected.
- Although Logiflex offers great matches from laminate to wood, they are not exact due to grain pattern and sheen variation from laminate to wood. They coordinate throughout a floor plan, however we recommend they not be utilized on the same piece of furniture. See the **Closest match - Wood stain / Laminate** guide.
- Adding a new product to an existing installation might result in color variations due to light exposure.
- **RAW** and **HATLEY** legs have a wood part.

3 Felt Colors for hexagonal tiles

Hexagonal felt tiles are 12" x 10-25/64" tiles covered with felt and are offered in a choice of 3 colors.

Appendix E: Calculation and Use of Electrical Components
**An Introduction to Calculation
and Use of Electrical Components**

Most people are uncomfortable with anything related to electricity. This step-by-step guide is intended for people who are not familiar with electrical installations but who have to specify what system they need when ordering furniture. In this guide, you will learn how to choose and specify the electrical components required for your projects. The list that follows illustrates and identifies each product and describes its applications.

The electrical components are all recognized by the Underwriters Laboratory (UL) as office furniture accessories and are manufactured according to Canadian Standards Association (CSA) and UL electrical standards.

Note: All electrical connections must be performed by a certified electrician.

By following these 3 simple steps, you can easily determine the number of circuits required to ensure safe use of your electrical system.

1. Determing the Number of Amperes Required
2. Calculating the Total Amperes
3. Determing How Many Circuits You Need

**STEP 1:
Determing the Number of Amperes Required**

What is Amperage
An Ampere (Amp or A) is a unit for measuring the rate at which electric current flows. All electrical equipment has an amperage rate. By following these few simple steps, you can easily determine the number of circuits required to ensure safe use of your electrical equipment.

Determine the Number of Amperes Required
On your computer or other electric devices (ie: monitor, central processing unit, printer) find the plate that provides the technical specifications as follows:

Input: 120V - 1.8A.

If you cannot locate this information on the machine, you will probably find it in the user manual.

Here are a few examples of how many Amps some equipment may consume. Please note that these are examples and the number of amperes may vary from one machine to another.

CPU	Monitor	Laptop	Printer	Server
2.5A	.5A	1A	9A	12A
Electrical System Capacity

Our electrical system is designed for circuits of 20 amps each. This includes electrical components such as computers, printers, laptops, monitors, server or other devices.

20A

A single Duplex has a maximum capacity of 20 A

Each power block can hold 2 Duplex

Each power block can hold 4 Duplex

= 20A

If the duplexes are connected to the same circuit, the capacity is divided between them. For example, 3 duplexes connected to the same circuit have a total capacity of 20A.

Appendix E: Calculation and Use of Electrical Components

STEP 2:
Calculating the Total Amperes
Add the Amperes

Add the number of amps for each machine. In our example, there are 4 CPUs at 2.5A per computer, 4 monitors at 0.5A and one printer at 9A.

2.5A **+** .5A **+** 2.5A **+** .5A **+** 2.5A **+** .5A **+** 2.5A **+** .5A **+** 9A **= 21A**

The total number of amperes used in this example equals to 21A.

Divide by 16

21/16 =1.3

Most machines and computers used in offices or schools are used continuously for many hours at a time. In this type of situation, national electrical codes usually limit circuits at 80% of their capacity of continuous use. Our electrical system is designed for circuits of 20 amps each. So 80% of 20A is 16 Amps You must therefore divide the total number of amperes calculated by 16.

STEP 3:
Determing How Many Circuits You Need

In most cases, this number will contain decimals. Round up to the next whole number, and this will be the number of circuits required for your equipment to run safely. If the number obtained is higher than 4 (the maximum number of circuits for a system), you must reduce the total amperage or add another electrical system. Continuing with our example, the 1.3A is rounded up to 2A.

1.3 ≈ 2
Here is one possible configuration. Using 5 power blocks joined together with junction cables, only 2 circuits are being used. The 4 workstations would be on the first circuit for a total of 16 amps. The printer would be on the second circuit.

0,5A   0,5A   0,5A   0,5A   9A

2,5A   2,5A   2,5A   2,5A

I   I   I   I   I   I   I   I   II   II
Appendix E: Calculation and Use of Electrical Components

8 Wire, 4 Circuit (3+1) Power Block

- Duplex are interchangable permitting any required circuit combination;
- Blocks for single or double sided applications;
- Complies with National Electric Code;
- UL Listed/Recognized.

Circuit I   Circuit II   Circuit III   Circuit IV

	Circuit I	Circuit II	Circuit III	Circuit IV	
N2				•	Gray

H1	•				Black
Starter Cable with Hardwire

- 4 circuit starter cable with hardwire at one end;
- 4 circuits rated for 20 AMP each;
- Available in lengths from 12"to 180";
- Whip end to be connected to building power by an electrican.

Starter Cable with Plug
- 1 circuit starter cable with 20A electrical plug;
- Circuit rated for 20 AMP;
- Available in lengths from 36"to 180".

Junction Cable
- 4 circuit cord;
- All circuits rated for 20 AMP;
- Available in lengths from 12"to 216".

Introduction

Appendix F: Locks

E1

See the E1 lock guide here
See the instruction videos of the E1 lock
Features:
- Keypad with backlight for easy distinction;
- Wrong code or illegal card alarm;
- Code combination ranging from 1 to 9 digits for multiple possibilities;
- Private and public mode;
- Stainless steel material;
- External power back up.

E2

See the E2 lock guide here
See the instruction videos of the E1 lock
Features:
- Tactile buttons and indicators sound for a premium experience;
- Automatic alarm after 4 attempts;
- 4 digit combination for 10,000 possibilities;
- For shared use (public);
- Low consumption of battery (more than 5,000 uses);
- Easy button cell battery change.

CMLK

Lock/Unlock by Master or User Card:
- Scan the master card near the instruction area. The green light comes on with a beep and the lock is unlocked.
- Permanent code mode: scan the card. The red light comes on with 2 beeps and the lock is automatically locked.
- One-time code mode: after unlocking by user card, the lock is in unlocked state.

Power supply	3 x AA alka-line batteries
Card type	EM card (125KHz)
Battery life	12~15 months
Static current	≤20µA
Dynamic current	≤200mA
Working temperature	-15~+55
Working humidity	20~95%RH
Alarm voltage	3.7±0.2V
Door thickness	≥ 1mm

Program/Change Master Card:
- After initialization, scan a card near the instruction area.
- After 3 long beeps, the programmed card becomes master card.
- During the flashing period of the LED, the other 2 cards can be programmed up to 3 times max.
- The other 2 cards are needed in the future if one or 2 cards are lost.
- The programming procedure is: * - master card - # new master card.
- After programming a new master, the lost master card is deleted.

Delete Permanent Code:
- Tap the master card on the inductive areas three times. After 3 short beep sounds the permanent code is deleted.

Lock/Unlock by Permanent Code:
- Digital code (max 9 digit) followed by #
- After being unlocked for five seconds, a red light and two beep will sound while the locking automatically.

Program your Personnal Code:
- Lock: Enter a 4-digit code and turn lock button to lock. Memorize this code. This code will be valid for one use only.
- Unlock: Enter this 4 digit code again and turn lock button to unlock. Do NOT press OK.
Forgotten Code:
- Note the serial number located on the side of the lock.
- Contact Logiflex to obtain the master code for your lock.
- Enter the 8-digit master code and press OK.
- Turn the lock to open.

Master Key Forgotten Code:
- Contact the person in charge of the master key.
- Insert the key and press OK.
- Turn the lock to open.

Master key sold separately, see Accessories.

Features:
- Key lock for use in lockers.
- Lock numbers are assigned randomly. Identical keys not available.
- The CMLK lock is different from the standard Logiflex lock. Additional keys and master keys are available on request. Mention that it is the locker lock.
- Finish: Chrome.

Battery case
Port for master key and serial number (on the side)
Touch screen
Lock
LED OK

Starter cable BE-PI72

CHICAGO CODE

There is a specific norm about Chicago electrical components. Some of our products are approved, but not all of them.

If you see this logo in Accessories, this means the product is **NOT** approved in Chicago. More info here.

Appendix G: Electrical Wire Management Solutions (following)

Example: Option 1.5" Space

Specify this option to allow a 1.5 space between the surface and panel for wiring to run below the surface.

Example: Island Station

The island stations have a removable panel on the side where there is no storage, the removable panels are used to provide access to plugs.

Example: IND Pedestal and High Pedestal

The pedestals have a 2.5' recess to pass wiring.
The pedestals have an open back for access to wiring, concealed with a removable panel on the cabinets and BB.
Appendix G: Electrical Wire Management Solutions (following)

Example : Storage Tower

Storage towers can be specified with a recessed back by requesting a cutout on the right, left or both sides.
Example : Under the Surface

A metal cable tray can be installed on the dividing panels and power walls. It is recommended to install the cable tray with the help of the supports CNT01/02/03.
If a cable tray is specified under an Elevation Plus table, it is recommended to specify a CTCOVER to hide the cables.
To pass wiring between dividing panels or in power walls, you must order a DSG and drill a 2.5" hole during installation.
Appendix H: Surface Support

Example : Dividing Panel

The dividing panels are dependent on the furniture inside, here are the rules to follow according to the specification;
Example : Power Wall

Power walls do not need furniture to be supported, Elevation Plus tables should be used more;

## T-shaped Power Wall with dividing panel - 54"H

PWLT - 54"H

Manufacturing Standards

Power wall with:
- 1" laminate frame with 6" interior space to allow the wiring to pass through;
- Open bottom for wire management;
- Open sides on the left and the right with connectors;
- Connectors compatible with power wall or end panels only;
- White nylon levelers;
- Vertical wood grain.
- Requires end panel when not connected to power wall
- 8" thick

Non freestanding furniture.

*Refer to Appendix H for specification rules.*

End panels are needed to close the ends. See p. 31.

Panel accessories sold separately.

Access panel with power block:
The option comes with the empty power block and a metal access panel that is fixed to the power wall with magnets. The metal finishes are available in Satin Nickel (SN), White (WH) and Black (BL). Duplexes, telecom plates and cables are sold separately.

Power block with finishing panel option not available on sides with division panel and for the *13" and *21" walls.

Pedestals

Independant E pedestal

EIND

A

16-1/16"
Independant pedestal with 2 utility drawers and file drawer:

- Pedestal without top;
- 2-3/8" back and sides recess for wire management;
- Fix to the panel using L bracket. The positioning brackets on the back allow you to leave a 2-3/8" wiring space and to attach the pedestal to the division panels or to the low walls.
- 14-3/32"H opening in the back;
- White nylon levelers;
- Handles H071BL;
- Lock;
- Height: 28"H.
- Attention: This pedestal is designed for use under a work surface or a return. A fitted surface - 16" wide - is not possible due to the width of the pedestal (16 1/16").

To use with power walls and division panels.

Remove lock as option, no extra charge.

Specify if different handle desired (no extra charge,).

(std)			

Color Combinations

Top   **Base**   **Front**   **Shelf**
👍 **Manufacturing Standards**

Credenza for Height Adjustable Table:

- Storage that integrates one of the legs of an Elevation Plus table. Fix to the panel using L bracket. The positioning brackets on the back allow you to leave a 2-3/8" wiring space and to attach the pedestal to the division panels or to the power walls;
- 1 utility drawer, 1 lateral file drawer for letter and legal formats, 1 open storage with 1 adjustable shelf;
- White nylon levelers;
- Interior height: 16-1/2"; Total height: 19".

For 29" deep tables only;
Not compatible with SMSS/SMUU modesties;

The table will be positioned with a clearance of 1" on the side and visitor side.

The SPF option is recommended when combined with electrical systems. It is recommended to install electrical systems below 18H, along with 12 additional inches of starter or jumper cable.

Handles: *For handles other than H071BL standard, please choose from the Logiflex list at no extra charge.*

Computer Monitor Bracket

- Computer monitor bracket with fixed arm support;
- Height-adjustable arm;
- Clamp mounted;
- Finish: Black.

Code	$	Description
C-1A	150	

C-1B

Computer Monitor Bracket

- Computer monitor bracket with flexible arm support;
- Height-adjustable arm;
- Clamp mounted;
- Finish: Black.

| Code	$	Description
C-1B	255	

C-2A

Double Computer Monitor Bracket

- Double computer monitor bracket with fixed arm support;
- Height-adjustable arms;
- Clamp mounted;
- Finish: Black.

Code	$	Description
C-2A	254	

C-2B

Double Computer Monitor Bracket
- Double computer monitor bracket with flexible arm support;
- Height-adjustable arms;
- Clamp mounted;
- Finish: Black.

| Code	$	Description
C-2B	452	

C-2A-1S

Triple Computer Monitor Bracket

- Triple computer monitor bracket with fixed arm support;
- Height-adjustable arms;
- Clamp mounted;
- Finish: Black.

| Code	$	Description
C-2A-1S	438	

C-2B-1S

Triple Computer Monitor Bracket

- Triple monitor bracket with 2 flexible arm supports;
- Height-adjustable arms;
- Clamp mounted;
- Finish: Black.

Code	$	Description
C-2B-1S	496	

SHIFT-2A

Shift Double Monitor arm with Docking

- 17" to 32" dual monitor arm support with flexible arms;
- 75mm and 100mm versa plate;
- Height adjustable arms that holds up to 8 kg (each);
- Clamp or Grommet mounted;
- Finish: Black;
- 8-in-1 Multiport docking station with:
  1 x Type - C Power distribution Port (100w)
  1 x Type - C Upstream port with type C cable included
  3 x USB-A Downstream ports
  2 x HDMI 2.0 Ports
  1 x RJ45 Ethernet port

**Power distribution cable not included, follow electronic devices input recommendations.**
