

Product Specifications

MIKA PATIENT ARMCHAIR - LFK RES

CONSTRUCTION

- The metal-to-metal cam lock construction makes it easy to replace components.
- The metal frame is in welded steel. The molded back and spring seat are made with multi-density foam for comfort and ergonomic support.
- The structural seat frame is made of welded steel for increased strength and durability. It can be assembled at three different heights and two different depths.
- The legs are equipped with non-marking glides.

ERGONOMICS AND MAINTENANCE

- Clearance space between the back and the cushion facilitates cleaning.
- Logilife chairs are specially designed to prevent premature wear and damage by avoiding contact between the back or armrests and surrounding walls.
- Extended and rounded polyurethane armrests give the user optimal support to safely and easily sit down and get up.
- A vinyl moisture barrier with aerators covers and protects the underside of the seat.

FINISHES

- Customers can choose an upholstery from the supplier of their choice.
- Metal frame is in Satin Nickel.

DIMENSIONS

Overall dim.: 25" w x 25" d x 45½" h
Seat dim.: 20½" L x 17" P x 18" H
Armrest height: 26"

COM YARDAGE REQUIRED

Seat and back yardage: 2
Seat yardage: 1
Back yardage: 1.5

OPTIONS

- Flammability technical bulletin CAL133.
- Removable slipcover for the head area, to reduce excessive wear and facilitate cleaning.
- Models presented are suggestions: they can be customized to meet individual needs.

WARRANTY AND CERTIFICATIONS

- Limited lifetime warranty.
- The Celcor foam used meets or exceeds the California Technical Bulletin 117 requirements.
- Products are manufactured in North America and comply with ISO9001.
